

# Initial assessment and historical investigation of contaminated sites: Zwickauer Kammgarn GmbH in Wilkau-Haßlau

C&E · Consulting und  
Engineering GmbH

D-09117 Chemnitz • Jagdschänkenstraße 52  
Tel.: +49 (0) 371 881 4228 • Fax: +49 (0) 371 881 4311  
E-mail: [info@cue-chemnitz.de](mailto:info@cue-chemnitz.de)  
Internet: [www.cue-chemnitz.de](http://www.cue-chemnitz.de)

**Project Objective:** The objective of the historical investigation is to provide all available information about all relevant data and especially about the historical development of the pollutant-suspicious sites and to use this information without any implementation of technical investigation. As a result it is to substantiate and evaluate the suspected contaminated area and to judge whether a technical investigation of the suspected contaminated area is considered necessary.

**Location:** Wilkau-Haßlau

**Client and Beneficiary:** Zwickauer  
Kammgarn  
GmbH

**Year:** 2006

**Budget:** 2.000 €

## Initial situation:

Following the evaluation of the researched documents and the site inspection 6 pollutant-suspicious objects were identified (engine shed, slag dump, former assembly hall for aviation engines, former oil storage, power station (coal) and former coal storage site). Under consideration of the existing and future use of the investigated areas and using the results of the evaluation with GEFA we secure that the investigated pollutant-suspicious areas are not dangerous for the protective goods. There is no need for the further investigations. The contaminated site should be left in the contamination register.

## Project services:

- Development of the research strategy
- Historical investigation and research including person questioning and archive research
- Risk assessment acc. to GEFA
- Evaluation and derivation of the measures to be taken
- Conception for the further investigations
