Objective: Project controlling and project management within the contract of indemnity
Risk assessment of soil and ground water, remediation activities

Location: Jüterbog,
Gartenstraße 4,
Brandenburg

Client: Bundesanstalt
für vereinigungs-
bedingte Sonder-
aufgaben (BvS)
(Federal Agency)

Year: 2006 - 2008

Budget: 15.000 €

Initial Situation:

The activities were implemented at the former bearing plant of Brandenburg, factory in Jüterbog. During the manufacture processes the underground and ground water have been contaminated by mineral oil hydrocarbons.

C&E was responsible for the controlling and monitoring of the risk assessment activities and preventive measures.

In this context in addition to the controlling, budget planning and cost control the measures to the risk assessment were evaluated and the site remediation measures were planned and supervised.

Services provided:

- Conceptual planning, progress report
- Presentation of tender procurement notices, tender evaluation, price comparison, tendering recommendations
- Supervision and assessment of investigation of contaminated sites in the soil and groundwater
- Invoice controlling and cost monitoring
- Preventive measures
- Supervision of remediation measures
