**Objective:** Thermal water exploration in the area of tectonic elements in the Middle Saxon disaster area under consideration of the regional hydrogeological situation

**Location:** Saxony

**Client:** State Office  
Bad Gottleuba

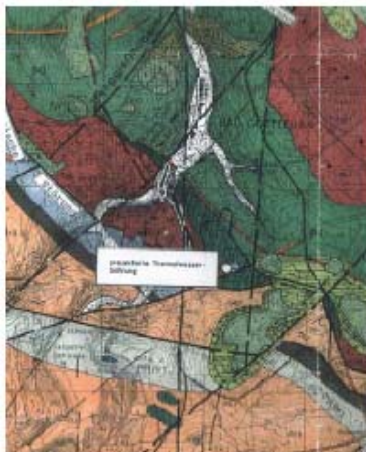

**Year:** 1995

**Initial situation:**

The objective of the hydrogeological exploration activities (conception, preliminary design) in the area of Bad Gottleuba was the thermal water exploration. The main objective of the project was the development of tourist infrastructure.

### Services provided:

- Analysis of the regional hydrogeological situation with consideration of the catchment area and balance calculations of ground water
- Identification of drilling sites and identification of the optimal drilling points
- Checking the approval criteria and environmental impact assessment, checking the possibility of connections to the existing supply system
