Objective: Construction of a waste water treatment facility and household waste landfill at Dospat. Stabilisation and remediation of settlings pond Eleshnitsa in Bulgaria.

Location: Eleshnitsa, Dospat, Bulgaria

Client: EC/Ministry of Regional Development, Bulgaria

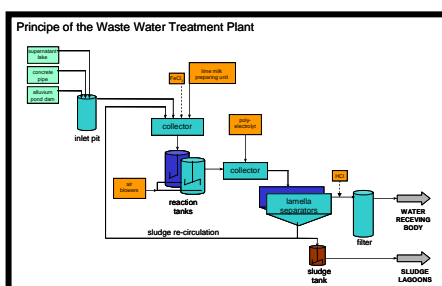

Period: 2002 - 2005

Budget: 2.6 mill EURO

Initial situation:

The settlings pond Eleshnitsa should be stabilised primary by the new surface water discharge system facility. Remediation through discharge and consolidation as well as covering processes is connected with the collection and cleaning of waste water and free water of the settlings pond. The house waste landfill Dospat should be constructed according to the European standards.

Main services:

Supervision of works as FIDIC Engineer and the Employers Representative according to the Bulgarian and EU directives and applying of Bulgarian and EU standards.
