Objective Remediation of a industrial site of the rubber manufacturing industry

Location: Berlin

Client: Freudenberg
Spezialdichtungs-
produkte KG

Year: 1999 – 2008

Budget: 100.000 €

Initial Situation:

The sites show the partly considerable contaminations of groundwater with BTEX-Aroma and lightly volatile chlorine hydrocarbons. These effects are caused by the deposit of raw and residual materials during the manufacture process for more than 80 years.

Services Provided:

- Remedial investigation and preliminary planning
- Development of investigation programs for remediation of contaminated sites
- Preparation of proposal acc. contracting rules for award of public works and service performance contracts, proposal evaluation, recommendation for the award of contract for all participants
- Supervision of remediation actions
- Project Management
- Coordination of remedial supervision
- Audit
