Project Objective: Invitation to tender for the project management, conceptual planning for the remediated areas of the former uranium ore mining in Johanngeorgenstadt and Breitenbrunn / Erzgebirge

Location: Johanngeorgenstadt/
Saxony

Client: Free State of
Saxony

Beneficiary: Saxon Superior
Mining Authority

Year: 2002

Initial Situation: The area of Johanngeorgenstadt was partly devastated by the abandoned mining and later by the uranium mining. For some objects it was absolutely necessary to evaluate the risks. Therefore it was to analyse the remediation requirements, to plan the relevant measures and to manage their planning and realisation.

Services Provided:

- Preparation of tendering procedures all over Europe
- Development of tender documents
- Evaluation of applications and offers
- Recommendations, argumentations, awarding
