Objective: Site remediation by replacement of soil and ground water purification

Location: Stadt Potsdam

Client: EWP GmbH und TOTAL Deutschland GmbH

Year: 2003 - 2006

Initial Situation:

From 1931 up to 1938 an industrial asphalt plant was located in the investigation area. At the end of the forties the tank farm was constructed there and operated till 1978. A lot of environmental damages are known from the period of operation. They caused massive pollution of soil and groundwater and environmental hazards of the bordering surface water Nuthe through petroleum derived hydrocarbon (TPH) and BTEX.

Services provided:

- A summary of the site situation
- Preparative remediation investigation
- Technical report of realisation of remediation measures
- Technical assistance
- Preparation of occupational safety and health plans
- Cost accounting
- Time scheduling
- Preparation of tender documents and participation in the assignment
- Remediation monitoring and creation of a quality concept
